

<b>JT Clutch Replacements</b>			Suit ALL JT191 F&S and 190 as well.
Remove the Gearbox from the engine to remove clutch. Plate will be either a 200mm or 215mm			
The recommendations below are 225mm and suitable for either size - up to 225mm.			
<b>225mm Parts</b>	Isuzu Number	Australian No:	Details: Brand is DAIKIN now EXEDU
Pressure Plate		<b>R900-546</b>	/ISC531 Probably an Isuzu Number
Driven Plate		<b>ISD108U</b>	Again probably refers to an Isuzu Number
Release Bearing		<b>NSK 48TKA3211</b>	
Flywheel Grind if necessary to suit. Clutch action will still be light and less likely to slip.
